Year 10 Work Experience

Monday 8 July - Friday 12 July 2024

Why Is Work Experience Important?

Research by DfE <u>here</u>

Evidence

Part of a careers programme

The National Picture

- GH has a solid wex programme we have evaluated its benefits
- GH has higher than the national average engagement with some schools not offering it. Our take up last year was 79% own placement finds
- Better outcomes for students

Why Is Work Experience Important For Students?

- Builds confidence
- Improves employability skills
- Builds networking links
- Opportunities for part time employment

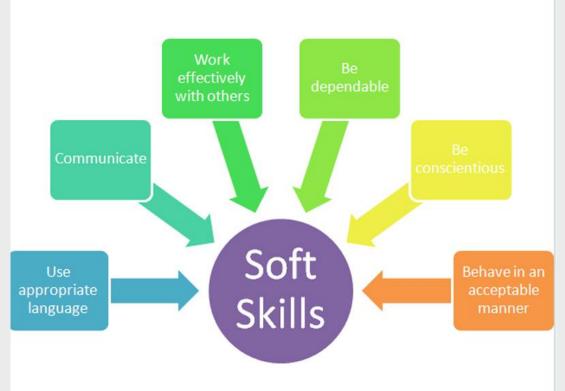

Aims of the work experience programme

Building 'soft skills'

Aims of the work experience programme

How Does The Programme Work?

 Students are expected to find their own placement

Why we DON'T match students with placements

- The aim of work experience
- Building resilience and encouraging students to persevere

Looking For A Placement

Support at home from parents

 Networking with friends, family and neighbours

#skillsweneed

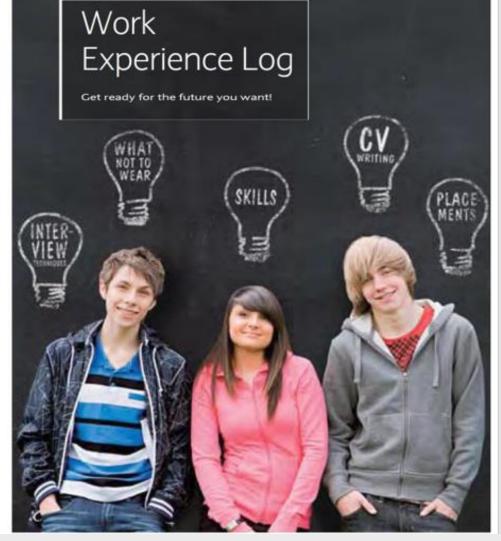

Listening

The receiving, retaining and processing of information or ideas

This skill is all about being able to effectively receive information whether it comes from customers, colleagues or stakeholders. Initially, the skill steps concentrate on being able to listen effectively to others - including remembering short instructions, understanding why others are communicating and recording important information.

Individuals then focus on how they demonstrate that they are listening effectively, thinking about body language, open questioning and summarising and rephrasing.

Beyond that, the focus is on being aware of how they might be being influenced by a speaker, through tone and language. The final steps are about critical listening - comparing perspectives, identifying biases, evaluating ideas and being objective. See if you can find three key points below:

|--|

Based on 8 **Employability** Skills

- Listening
- Speaking
- Teamwork
- Aiming High
- Creativity
- Staying **Positive**
- Problem Solving
- Leadership

Creativity

The use of imagination and the generation of new ideas

Creativity is the

complement to Problem Solving, and is about generating innovations or ideas which can then be honed through the problem-solving process.

The first few steps focus on the individual's confidence in imagining different situations and sharing their ideas.

The focus is then on generating ideas - using a clear brief, making improvements to something that already exists and combining concepts.

Individuals then apply creativity in the context of their work and their wider life. They can build off this to develop ideas using tools like mind mapping, questioning, and considering different perspectives.

The most advanced steps focus on building effective innovation in group settings and by seeking out varied experiences and stimuli. Finally, individuals support others to innovate, by sharing tools, identifying the right tools for the situation and through coaching.

1.	Share your ideas
